

BUSINESS AND CONSUMER SURVEYS

ECONOMICS RESEARCH CENTRE
UNIVERSITY OF CYPRUS

June 2020

SUMMARY

- In June 2020, economic sentiment in Cyprus improved as the Economic Sentiment Indicator (ESI-CypERC) increased by 2.3 points compared with May 2020. The increase in ESI-CypERC was driven by confidence gains in all sectors, except in construction, as well as by improvements in consumer confidence.
- The Services Confidence Indicator rose marginally as the upward revisions in demand expectations were almost offset by the deterioration in firms' assessments about their recent performance.
- The increase in the Retail Trade Confidence Indicator was due to firms' more favourable assessments of their stock levels and upward revisions in sales expectations.
- The Construction Confidence Indicator remained unchanged as more optimistic employment expectations were offset by worsening assessments of the levels of order books.
- The Industry Confidence Indicator increased due to less adverse assessments of the current levels of order books and upward revisions in production expectations.
- The rise in Consumer Confidence Indicator reflected less pessimistic views on all three forward-looking components, i.e. household financial condition, economic conditions in Cyprus and expenditure on major purchases.
- Business and consumer expectations improved in June; nonetheless, uncertainty in all sectors and households increased vis-à-vis a similar period in 2019. Uncertainty among firms in services and consumers rose further in June. Although uncertainty among firms in retail trade, construction and industry declined in June, it remained well-above its 2019 levels.

Notes: ¹ The weights used in the calculation of the Economic Sentiment Indicator constructed by the Economics Research Centre (ESI CypERC) reflect the contribution of each sector to the GDP of Cyprus.

² GDP growth: GDP (in real terms, adjusted for seasonality and working days) is compared to the same quarter of the previous year (Source: Statistical Service of Cyprus).

The Economics Research Centre of the University of Cyprus (CypERC) and RAI Consultants Ltd participate in the Joint Harmonised European Union Programme of Business and Consumer Surveys. CypERC acknowledges funding from the European Union, the Ministry of Finance and the University of Cyprus for conducting the project "Business and Consumer Surveys" in Cyprus.

Uncertainty: difficulty predicting household's financial situation ^{5,6}			-5									-1	4

Notes: ¹ The balance is the difference between the percentage of positive responses and the percentage of negative responses. Positive responses refer to "increase", "improvement", "above normal", "very likely", "fairly likely", etc., while negative responses refer to "decrease", "deterioration", "below normal", "not at all likely", "not likely", etc. Data are seasonally adjusted. ² The weights used in the calculation of the Economic Sentiment Indicator reflect the contribution of each sector to the GDP of Cyprus.

³ The calculation of the confidence (composite) indicator is described in http://ec.europa.eu/economy_finance/indicators/business_consumer_surveys/userguide_en.pdf and https://ec.europa.eu/info/files/revised-consumer-confidence-indicator_en. ⁴ The responses to this question are used in the calculation of the confidence (composite) indicator for each survey. ⁵ The responses to this question are not adjusted for seasonality. ⁶ The balance is the difference between the percentage of respondents who state that the future business situation (or household financial situation) is difficult to predict, and the percentage of respondents who state the opposite. The data for 2019 refer to the average of the balances over the period May – August.
